MoReVoX – MSP

IMPULSE RESPONSE LIBRARY

FORMAT : WAV | Apple Space Designer

Modulated – Spring – Plate

Spring verbs with fat and rich tails, Modulated Plates, Dense Spring with early plate sound ... these are only few "dream" verb sounds that are now truth with MSP.

MSP has been developed mixing several top quality modern and vintage hardware though the unique MoReVoX IRs design based on the M/S harmonics distortion.

The 200 MSP IRs are divided into Modulated and Spring-Plate; the Modulated category contains a rich collection of dense Plates and Rooms modulated with extensive use of Leslies, the Spring-Plate category instead contains outstanding dense Springs made unique with Plate sounds components.

How MSP sounds?

MSP, like all the MoReVoX IRs, has an unique sound not directly comparable to any other hardware or plug-in on the market: MSP has an original sound, because it synthesizes complex fx chains.

Vintage style evocative ambiances perfect for guitars, unusual wide and modulated plate/spring verbs able to transform poor virtual instrument into record ready sounds, perfect ambiances able to enhance and to define the instrument position in the mix the goal for orchestral sounds and more ..

MSP means new and unique dimensions for your sounds, start now!

Developed by : Sabino Cannone

It's also available "MSP Free" with 10 IRs free

Prices : \$ 49 (Full License)
 \$ 29 (For Retròverb Users)
 \$ 89 (Retròverb3+MSP)
